Persona similarity report

Activity spread, repost behavior, weekly retweet dynamics, and semantic overlap (train tweets vs persona text).

Generated (UTC): 2026-04-14T17:29:22.832670+00:00

Train CSV: C:\Users\nikit\Downloads\Oasis_copy\persona_generation\outputs\train_tweets.csv

Personas CSV: C:\Users\nikit\Downloads\Oasis_copy\persona_generation\outputs\user_personas.csv

Activity spread (train)

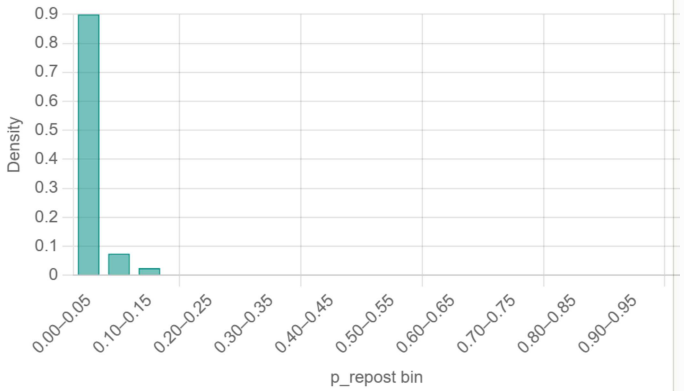

463	4506	44.59
Users	Total tweets	Effective # users

0.8156	0.6814
Norm. entropy	Gini (counts)

Metric	Value
HHI (users)	0.022426
Top-10 volume share	0.3362
Users in corpus	463

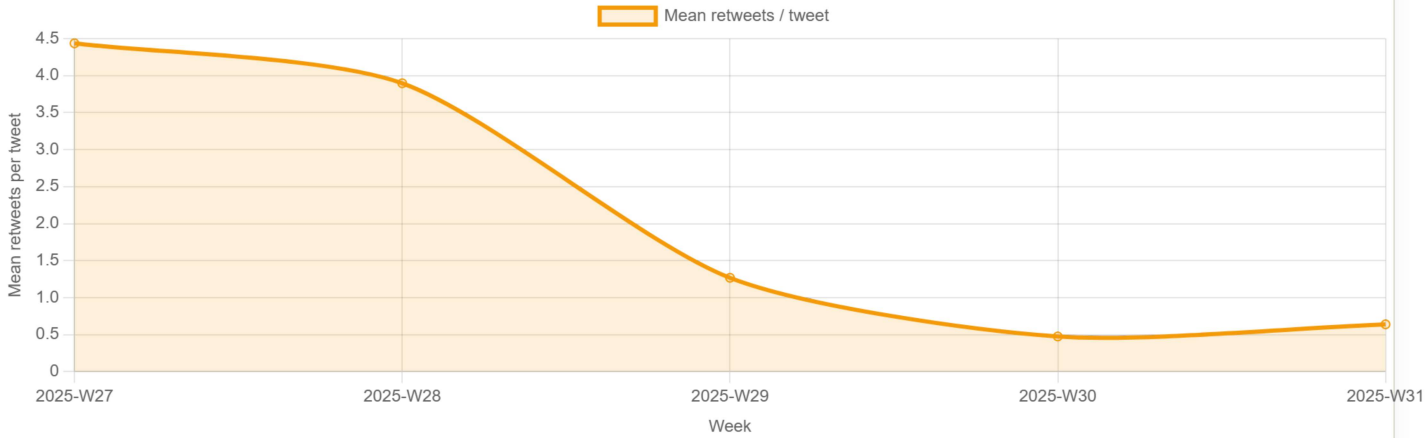

Repost propensity (personas)

n=40 · mean p_repost=0.019936 · std=0.026051

Weekly retweet dynamics (train)

Mean retweets per tweet by ISO week (UTC).

Semantic distribution (real tweets vs persona corpus)

Metric	Value
Model	paraphrase-MiniLM-L6-v2
Real texts	400
Sim / persona texts	1117
Centroid cosine (sim vs real)	0.9513
Mean max-match	0.6401
Real random-pair cohesion	0.3513

Metric	Value
Sim random-pair cohesion	0.2462

Repost distribution check

Self-comparison of persona `p_repost` (expect Jensen-Shannon ≈ 0).

Metric	Value
Jensen–Shannon (p_repost)	0
Bins	20
