# Persona similarity report

Activity spread, repost behavior, weekly retweet dynamics, and semantic overlap (train tweets vs persona text).

**Generated (UTC):** 2026-04-14T16:35:31.098725+00:00

**Train CSV:** C:\Users\nikit\Downloads\Oasis_copy\persona_generation\outputs\train_tweets.csv

**Personas CSV:** C:\Users\nikit\Downloads\Oasis_copy\persona_generation\outputs\user_personas.csv

## Activity spread (train)

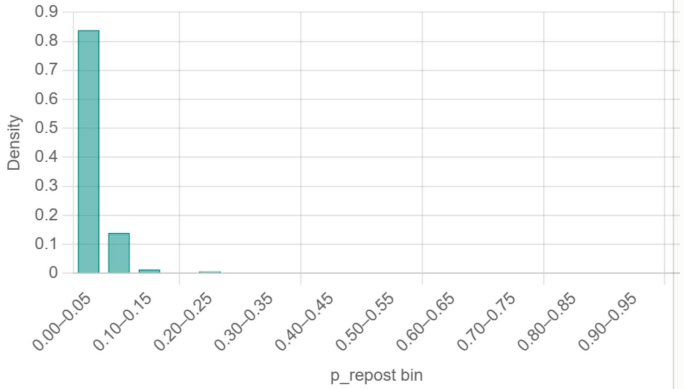

| 463 | 4506 | 44.59 |
|---|---|---|
| Users | Total tweets | Effective # users |

| 0.8156 | 0.6814 |
|---|---|
| Norm. entropy | Gini (counts) |

| Metric | Value |
|---|---|
| HHI (users) | 0.022426 |
| Top-10 volume share | 0.3362 |
| Users in corpus | 463 |

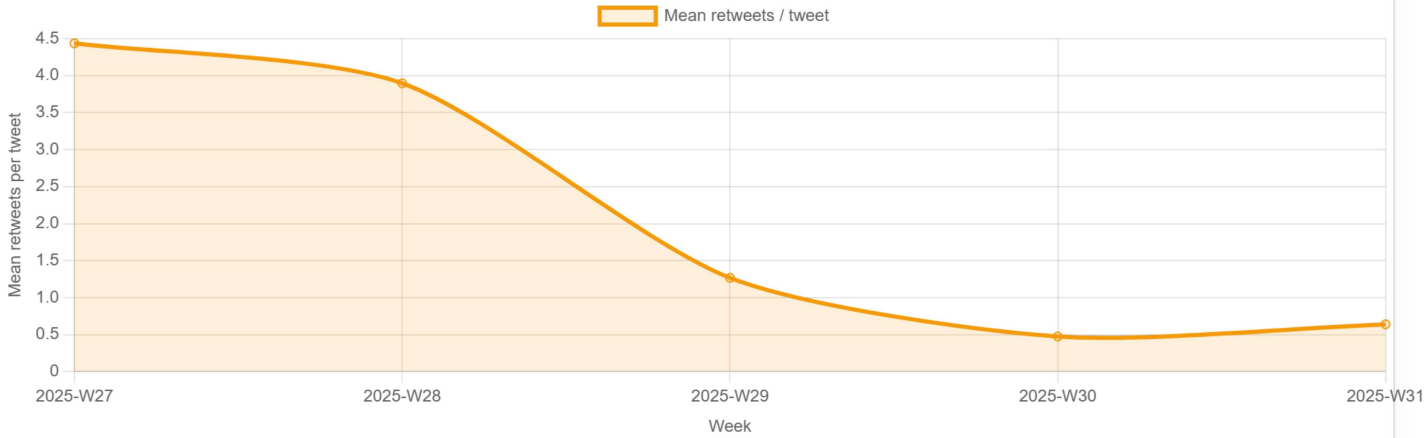

## Repost propensity (personas)

n=143 · mean p_repost=0.023059 · std=0.031778

## Weekly retweet dynamics (train)

Mean retweets per tweet by ISO week (UTC).

## Semantic distribution (real tweets vs persona corpus)

| Metric | Value |
|---|---|
| Model | paraphrase-MiniLM-L6-v2 |
| Real texts | 400 |
| Sim / persona texts | 523 |
| Centroid cosine (sim vs real) | 0.9255 |
| Mean max-match | 0.6847 |
| Real random-pair cohesion | 0.3513 |

| Metric | Value |
|---|---|
| Sim random-pair cohesion | 0.391 |

## Repost distribution check

Self-comparison of persona `p_repost` (expect Jensen-Shannon ≈ 0).

| Metric | Value |
|---|---|
| Jensen–Shannon (p_repost) | 0 |
| Bins | 20 |
